The Groupe Banque Populaire du Maroc chooses GALITT Testing Solutions

Boulogne (France), July 15th, 2010

These past few years, the market of electronic payments in Morocco has gone through a very significant development. The sustained growth of the Moroccan economy, the increasing demand for means of payment and above all the indisputable dynamism of banks have brought this industry to maturity. Now in a very innovative environment, offering more and more effective services, mastering technologies to provide customers with a real quality of services is essential. Thus this is why the Groupe Banque Populaire du Maroc acquired a testing platform.

Optimizing the testing process and setting up completely the tests of its payment system are an unbreakable priority for the Groupe Banque Populaire du Maroc. With its pragmatic attitude, the Moroccan bank has chosen GALITT as its supplier of testing solutions. The test platform implemented by GALITT in collaboration with the Groupe Banque Populaire du Maroc is based on the KaNest[®] simulator range. The test platform allows payment transaction simulation, automation of the current testing process and also stress testing.

Michel Manas, Software consultant at GALITT declares, "Testing better, testing more, testing often, testing to the limits... produce a high level of quality of service. We are happy to assist the Groupe Banque Populaire du Maroc in reasserting the value of testing job. This new testing platform will allow testers to focus on added value issues such as design and test optimization."

"GALITT will know how to support our testing process and its services will be extended beyond the simple provision of test tools "confirms Anas Drihany, Payment system Director of the Groupe Banque Populaire du Maroc.

About GALITT (www.galitt.com) – GALITT gathers more than 20 years of experience in mastering e-transactions. Consulting services on payment systems cover the whole project cycle: ANTICIPATE – INITIATE – BUILD – IMPROVE, from a marketing to a technical approach. Company competences include: business consulting, EFT business analysis, design and specifications, project management, acceptance testing and audit. GALITT organizes training sessions dedicated to payments systems and card technologies. GALITT also offers engineering services on transaction systems and embedded software (programming, maintenance), and provides software including simulators (KaNest[®], KaNest[®]-ICC), personalization verification tools (VISUCARD[®]) and added value solutions (VISUBANK[®], private labels...).

GALITT is the recognized leader in France in all its businesses, and the worldwide leader in providing test tools.

Being a reference in the electronic transaction business, GALITT is leveraging internal synergies to provide integrated added value services to the industry.
